Frontend Developer

Frontend Developer with solid experience in designing and developing intuitive and functional user interfaces (UI), optimized to enhance user experience and application performance. Proficient in React.js, Next.js, TypeScript, Tailwind CSS, Bootstrap, HTML5, CSS/SASS, and JavaScript, with expertise in Single Page Applications (SPA) development. Experienced in international projects, applying Agile methodologies and utilizing tools such as JIRA and Confluence for task management and documentation. Focused on efficiency, scalability, and meeting deadlines.

PROFESSIONAL EXPERIENCE

Gransolar Group

Frontend Developer

Madrid, Spain

June 2022 – January 2025

- Developed interactive **user manuals** using **React and TypeScript**, improving usability for technical teams and end users.
- Designed and implemented **industrial applications** and **intuitive HMI interfaces** using **SCADA (Ignition Automation)**, optimizing real-time process monitoring and control.
- Updated and maintained **R&D&I systems**, managing instrumentation, PLCs, and Gateways to ensure performance and availability.
- Integrated **industrial devices with customized control panels**, adapting them to client requirements.
- Created and managed **MySQL databases**, optimizing data storage for industrial projects.

Verticecrea C.A. - [verticecrea.com](https://www.verticecrea.com)

Frontend Developer

Madrid, Spain

February 2020 – March 2022

- Developed and implemented **custom web applications**, enhancing user experience with **React.js and Next.js**.
- Built **responsive interfaces** using **CSS/SASS, Bootstrap, and Tailwind CSS**.
- Utilized **SSR (Server-Side Rendering)** and **SSG (Static Site Generation)** with **Next.js**, improving load speed and performance.
- Collaborated with clients to define requirements and deliver **scalable solutions**.

Banco Santander - Openscript Consulting

FullStack Developer

Madrid, Spain

July 2018 – November 2020

- Supervised and analyzed **banking applications** using **J2EE, XML**, and web servers such as **Apache HTTP Server**.
- Diagnosed and resolved **server failures**, reviewing **J2EE logs** and using **Linux commands** to manage memory, redistribute loads, and switch nodes.
- Automated tasks in **Linux consoles using Bash scripting**, optimizing processes and reducing response times.
- Assisted in **basic testing and deployments**, ensuring system **stability and performance** for both front-end and back-end applications.
